D. O. LR No. Z-28015/25/2019-BC (NHM)

Dated April 16, 2020

Dear Admiral Devendra Joshi Ji,

At the outset, I would like to appreciate the hard work being done by your team under your able leadership in effective management of COVID-19.

2. You would agree that availability of blood in the blood banks, both public and private, for addressing various exigencies and emergencies is essential. We are also cognizant of the situation that due to restrictions, it may not be possible to organize blood donation camps. However, at the same time, it is necessary to ensure sufficient availability of blood, especially for people needing regular blood transfusion on account of blood disorders such as Thalassemia, Sickle Cell Anemia and Hemophilia etc.

3. Keeping in view the present peculiar situation due to COVID-19, I shall be grateful if the following measures, *inter alia*, are taken to ensure adequate availability of blood in the blood banks, namely: -

- Appeal for Blood donation from Hon'ble Chief Minister and yourself may be published in local dailies and telecast and broadcast in local media channels.
- Use of e-Raktkosh portal as a single point for maintaining records of donors as well as providing real-time information on status of current stocks of each blood group may be encouraged. The prospective blood donors may be asked to register on the portal. Blood Banks in your state may also be directed to update blood availability in the e-Raktkosh portal regularly.

- (c) States may make necessary arrangements for sending blood collection and transportation vans or any other hired vehicles, to maintain adequate availability of blood in an area.
- (d) States may adopt flexible timings and may also like to extend the hours of fixed and mobile donor sessions. It may be suggested to donors to come in a staggered manner for blood donation and social distancing norms are maintained.
- (e) All voluntary donors may be given passes for smooth movement and such donors donating blood during this critical time may be given Special Certificates.
- (f) Extra safety measures should be taken at the Blood Donation Centers, pertaining to infection prevention and personal protection such as regular hand washing, wiping down donor-touched areas, using sterile collection sets for every donation and preparing the arm with an aseptic cleanser.
- (g) Assured availability of iron chelating agents and anti-hemophilia factors at hospitals, where Thalassaemic and Hemophilic patients avail the services, may also be ensured.

With regards

Yours sincerely,

(Dr. Harsh Vardhan)

D. O. LR No. Z-28015/25/2019-BC (NHM)

Dated April 16, 2020

Dear Dr R. Lalthangliana Ji,

At the outset, I would like to appreciate the hard work being done by your team under your able leadership in effective management of COVID-19.

2. You would agree that availability of blood in the blood banks, both public and private, for addressing various exigencies and emergencies is essential. We are also cognizant of the situation that due to restrictions, it may not be possible to organize blood donation camps. However, at the same time, it is necessary to ensure sufficient availability of blood, especially for people needing regular blood transfusion on account of blood disorders such as Thalassemia, Sickle Cell Anemia and Hemophilia etc.

3. Keeping in view the present peculiar situation due to COVID-19, I shall be grateful if the following measures, *inter alia*, are taken to ensure adequate availability of blood in the blood banks, namely: -

- Appeal for Blood donation from Hon'ble Chief Minister and yourself may be published in local dailies and telecast and broadcast in local media channels.
- Use of e-Raktkosh portal as a single point for maintaining records of donors as well as providing real-time information on status of current stocks of each blood group may be encouraged. The prospective blood donors may be asked to register on the portal. Blood Banks in your state may also be directed to update blood availability in the e-Raktkosh portal regularly.

- (c) States may make necessary arrangements for sending blood collection and transportation vans or any other hired vehicles, to maintain adequate availability of blood in an area.
- (d) States may adopt flexible timings and may also like to extend the hours of fixed and mobile donor sessions. It may be suggested to donors to come in a staggered manner for blood donation and social distancing norms are maintained.
- (e) All voluntary donors may be given passes for smooth movement and such donors donating blood during this critical time may be given Special Certificates.
- (f) Extra safety measures should be taken at the Blood Donation Centers, pertaining to infection prevention and personal protection such as regular hand washing, wiping down donor-touched areas, using sterile collection sets for every donation and preparing the arm with an aseptic cleanser.
- (g) Assured availability of iron chelating agents and anti-hemophilia factors at hospitals, where Thalassemic and Hemophilic patients avail the services, may also be ensured.

With regards

Yours sincerely,

- (c) States may make necessary arrangements for sending blood collection and transportation vans or any other hired vehicles, to maintain adequate availability of blood in an area.
- (d) States may adopt flexible timings and may also like to extend the hours of fixed and mobile donor sessions. It may be suggested to donors to come in a staggered manner for blood donation and social distancing norms are maintained.
- (e) All voluntary donors may be given passes for smooth movement and such donors donating blood during this critical time may be given Special Certificates.
- (f) Extra safety measures should be taken at the Blood Donation Centers, pertaining to infection prevention and personal protection such as regular hand washing, wiping down donor-touched areas, using sterile collection sets for every donation and preparing the arm with an aseptic cleanser.
- (g) Assured availability of iron chelating agents and anti-hemophilia factors at hospitals, where Thalassaemic and Hemophilic patients avail the services, may also be ensured.

D. O. LR No. Z-28015/25/2019-BC (NHM)

Dated April 16, 2020

Dear Shri Nitin Patel Ji,

At the outset, I would like to appreciate the hard work being done by your team under your able leadership in effective management of COVID-19.

2. You would agree that availability of blood in the blood banks, both public and private, for addressing various exigencies and emergencies is essential. We are also cognizant of the situation that due to restrictions, it may not be possible to organize blood donation camps. However, at the same time, it is necessary to ensure sufficient availability of blood, especially for people needing regular blood transfusion on account of blood disorders such as Thalassemia, Sickle Cell Anemia and Hemophilia etc.

3. Keeping in view the present peculiar situation due to COVID-19, I shall be grateful if the following measures, *inter alia*, are taken to ensure adequate availability of blood in the blood banks, namely: -

- (a) Appeal for Blood donation from Hon'ble Chief Minister and yourself may be published in local dailies and telecast and broadcast in local media channels.
- (b) Use of e-Raktkosh portal as a single point for maintaining records of donors as well as providing real-time information on status of current stocks of each blood group may be encouraged. The prospective blood donors may be asked to register on the portal. Blood Banks in your state may also be directed to update blood availability in the e-Raktkosh portal regularly.

- (c) States may make necessary arrangements for sending blood collection and transportation vans or any other hired vehicles, to maintain adequate availability of blood in an area.
- (d) States may adopt flexible timings and may also like to extend the hours of fixed and mobile donor sessions. It may be suggested to donors to come in a staggered manner for blood donation and social distancing norms are maintained.
- (e) All voluntary donors may be given passes for smooth movement and such donors donating blood during this critical time may be given Special Certificates.
- (f) Extra safety measures should be taken at the Blood Donation Centers, pertaining to infection prevention and personal protection such as regular hand washing, wiping down donor-touched areas, using sterile collection sets for every donation and preparing the arm with an aseptic cleanser.
- (g) Assured availability of iron chelating agents and anti-hemophilia factors at hospitals, where Thalassemic and Hemophilic patients avail the services, may also be ensured.

D. O. LR No. Z-28015/25/2019-BC (NHM)

Dated April 16, 2020

Dear Shri T S Deo Ji,

At the outset, I would like to appreciate the hard work being done by your team under your able leadership in effective management of COVID-19.

2. You would agree that availability of blood in the blood banks, both public and private, for addressing various exigencies and emergencies is essential. We are also cognizant of the situation that due to restrictions, it may not be possible to organize blood donation camps. However, at the same time, it is necessary to ensure sufficient availability of blood, especially for people needing regular blood transfusion on account of blood disorders such as Thalassemia, Sickle Cell Anemia and Hemophilia etc.

3. Keeping in view the present peculiar situation due to COVID-19, I shall be grateful if the following measures, *inter alia*, are taken to ensure adequate availability of blood in the blood banks, namely: -

- (a) Appeal for Blood donation from Hon'ble Chief Minister and yourself may be published in local dailies and telecast and broadcast in local media channels.
- (b) Use of e-Raktkosh portal as a single point for maintaining records of donors as well as providing real-time information on status of current stocks of each blood group may be encouraged. The prospective blood donors may be asked to register on the portal. Blood Banks in your state may also be directed to update blood availability in the e-Raktkosh portal regularly.

- (c) States may make necessary arrangements for sending blood collection and transportation vans or any other hired vehicles, to maintain adequate availability of blood in an area.
- (d) States may adopt flexible timings and may also like to extend the hours of fixed and mobile donor sessions. It may be suggested to donors to come in a staggered manner for blood donation and social distancing norms are maintained.
- (e) All voluntary donors may be given passes for smooth movement and such donors donating blood during this critical time may be given Special Certificates.
- (f) Extra safety measures should be taken at the Blood Donation Centers, pertaining to infection prevention and personal protection such as regular hand washing, wiping down donor-touched areas, using sterile collection sets for every donation and preparing the arm with an aseptic cleanser.
- (g) Assured availability of iron chelating agents and anti-hemophilia factors at hospitals, where Thalassaemic and Hemophilic patients avail the services, may also be ensured.

With regards

Yours sincerely,

(Dr. Harsh Vardhan)
